C-UAS Program Management

COMPANY OVERVIEW

Aspire Systems & Consulting, LLC is a VA/CVE-Certified Service-Disabled Veteran-Owned Small Business (SDVOSB) providing operations, intelligence and data analysis expertise in support of clients requiring a Counter Uncrewed Aircraft Systems (C-UAS) capability against Group I and Group II small UAS.

Established in 2000 as a quantitative research firm, our analysts personally developed many of the C-UAS methodologies and analytical toolsets used to successfully counter ISIS and Al Qaeda drone attacks and surveillance efforts.

Each of our analysts has completed multiple deployments to theaters supporting warfighters in combat operations - either as unit-level embeds or as part of C-UAS staff elements.

Our extensive C-UAS experience provides our clients with a wide spectrum of solutions to implement against Group I and Group II UAS threats, which includes maintaining a passive C-UAS posture, implementing an active C-UAS defense, and enabling an active targeted response.

C-UAS Operations

- Scalable and flexible solutions to meet client requirements
- On- and off-site analytical support
- Unmatched experience in C-UAS mission execution

Site & System Assessments

- UAV Site C-UAS preparation
- C-UAS program readiness assessment
- Red Team scenario development
- System-level integration testing

C-UAS Data Analytics

- Predictive statistical analyses to prepare a robust threat response
- UAS TTP identification and attribution
- Recovered UAS exploitation (TBD)
- Intelligence-driven CoA development
- Integrated UAS data capture, standardization and analysis of tactical threats and strategic intents

C-UAS Program Management

- Program design, planning, execution and sustainment
- Operations, intelligence and data analyst instruction/train-the-trainer
